## Courses Calendar (Open to all)

### 3- CORE (CATEGORY-1) COURSES

### 5- CATEGORY-2 COURSES

- 1. May 27, 2020**  
**5:30 pm to 8:30 pm**

**“Orthodontic diagnosis and treatment planning considerations in anterior esthetics and functional occlusion”:** Category 2  
Dr. Shakti Singh  
Members Free - Non members \$89+HST/person
- 2. Sept 10, 2020**  
**5:00 pm to 9:00 pm**

**The 10 most prescribed Drugs: Core 1**  
**What you need to know**  
Dr. Aviv Ouananounou  
Members Free - Non members \$179+HST/person
- 3. Sept 24, 2020**  
**5:00 pm to 9:00 pm**

**Whmis Training; Core 1**  
Dr. Neil Gajjar  
Members Free - Non members \$89+HST/person
- 4. Oct 14th, 2020**  
**5:00 pm to 9:00 pm**

**Classification of Periodontal and Peri-Implant Diseases and conditions : Core 1**  
Dr. Siavash Hassanpour and Dr. Ryan Schure  
Members Free - Non members \$179+HST/person
- 5. Oct 22, 2020**  
**5:30 pm to 8:30 pm**

**Porcelain Veneers and crowns- an update.**  
Category 2  
Dr. Omar El-Mowafy  
Members Free - Non members \$89+HST/person
- 6. Nov 18,2020**  
**5:30 pm to 8:30 pm**

**Clots, Clasts and Caries:**  
Oral surgical management of your medically compromised patient - Knowledge Update 2020  
Category 2  
Dr. Don Hui & Dr. Kal Rammo  
Members Free - Non members \$89+HST/person
- 7. Dec 9, 2020**  
**6:00 pm to 9:00 pm**

**PLP: Changing times...Changing needs : Core 1**  
Alan Lachapelle & Dr. Peter Hong  
Members Free - Non members \$179+HST/person

**Venue: Mississauga Convention Centre**  
75 Derry Road West, (Hwy 10 and Derry Rd)  
Mississauga ON L5W 1G3

**Dr. Shakti Singh**

### Biography:

Dr Shakti Singh Graduated from Manipal College of Dental Sciences in India and later finished his Post graduate studies in Orthodontics from the same institution. Originally from New Delhi, Dr. Singh was an outstanding student accumulating numerous awards and achievements including the Indian Dental Association Scholarship for 1st place standing in the final year dental exams.

Wanting to pursue orthodontics in Canada, Dr. Singh was able to secure a spot in graduate Orthodontic program, at the Faculty of Dentistry, University of Toronto, for foreign trained orthodontists. Since finishing his 2nd residency, Dr. Singh worked as an active partner and later as an owner at "Smiles in Motion" orthodontic office in Brantford.

Dr. Singh's areas of interest are- use of temporary anchorage devices in moderate to severe skeletal discrepancy cases to produce orthognathic surgery like results and use of clear aligner therapy to effectively and efficiently treat adults and children alike.

### Course Outline:

Class I and Class II malocclusions make a bulk of orthodontic cases in a dental practice. It is a challenge to accurately diagnose and distinguish mild to moderately difficult cases from very complex cases which deceptively appear simple. An incorrect diagnosis results in an inappropriate treatment plan which may lead to improper bite, poor facial esthetics and excessive time to finish a case.

This course will focus on 5 basic/key points which will help you assess and plan a case in the most appropriate and efficient way.

**The 10 most prescribed Drugs: What you need to know**  
**Speaker: Dr. Aviv Ouanounou**

**DR. AVIV OUANOUNOU**

BSc, MSc, DDS, FICD, FICO

**Biography Dr Aviv Ouanounou:**

Dr. Aviv Ouanounou is an assistant professor of pharmacology and Preventive Dentistry at the faculty of dentistry, University of Toronto. He received both his DDS and MSc at the University of Toronto. He teaches pharmacology and Preventive Dentistry to undergraduate and graduate students and is also a clinical instructor and Treatment Plan Coordinator. Dr. Ouanounou won numerous teaching awards including winning “Best Teacher of the Year Award” three times: in 2013, 2015 and just recently in 2019. Also, Dr. Ouanounou is the recipient of the 2014-2015 prestigious Dr. Bruce Hord Master Teacher Award for excellence in teaching at the Faculty of Dentistry at the University of Toronto. Dr. Ouanounou is a Fellow of the International College of Dentists. He is a member of the American Academy of Pain Management and the American College of Clinical Pharmacology. He has published and authored numerous articles in peer-reviewed journals. He also maintains a general private practice in Toronto.

**The 10 most prescribed drugs: What do you need to know?**

Pharmacology is the study of Drugs and their effects on the human body. Chronic medical conditions such as cancer, cardiovascular disease, endocrine disorders and neurological conditions are very prevalent worldwide. In this course we will discuss the top 10 prescribed drugs in North America. We will review the pharmacological actions of these drugs, any reported adverse reactions and drug interactions associated with their use. We will review the effects of these medications on the oral cavity and any needed dental modifications for these patients. Specific emphasis will be given to the effects and interactions of these commonly prescribed drugs with those often given by dentists namely, local anaesthetics, analgesics, antibiotics and antifungals.

**Learning Objectives:**

1. Identify the top 10 prescribed drugs.
2. Recognize the indications and contraindications of these commonly prescribed drugs.
3. Discuss the mechanism of action, adverse reactions and drug interactions of the most commonly prescribed medications.
4. Discuss the top 10 prescribed drugs and their interactions with dental treatment and commonly prescribed dental drugs.

## Dr. Neil Gajjar

BSc, DDS, MAGD, FADI, PFPA, FICD, Cert. IV Sedation

Dr. Neil Gajjar graduated from Howard University College of Dentistry, Washington, DC in 1999.

From the very beginning Dr.Gajjar has played a very active role in organized dentistry and keeping the interest of the dental community close to his heart. He has served as president of SADA as well as AGD – Academy of General Dentistry. He has been active with the RCDSO having been appointed to the Disciplines Committee, QA committee, councilor position and

currently serves on the PLP committee.

In addition, he lectures on managing medical emergencies in the dental office as well. He maintains a private practice in Mississauga .

### Course Outline:

#### **WHMIS- Workplace Hazardous Materials Information System**

It is a hazard communication system designed to ensure workers using hazardous materials, also known as controlled products, have the necessary information to safely handle, store and dispose of these materials.

#### **Who should take this course?**

**All members of the dental team must have mandatory WHMIS training.**

#### **Course objectives:**

The primary objective of this course is to provide participants with the skills necessary to access and apply the information needed to protect their health and safety when working with, or in proximity to, WHMIS controlled products.

The course is presented in 6 modules:

1. Introduction
2. Product Labels
3. Hazard Symbols
4. Material Safety Data Sheets
5. WHMIS Education- Responsibilities and Roles
6. Exemptions and Restricted Applications

#### **Evaluation Process:**

At the end of the course, there is a test. Participants must successfully complete the test to be awarded a certificate of completion.

October 14, 2020 | Thursday, 5:00 pm to 9:00 pm: Core Course

**Classification of Periodontal and Peri-Implant Diseases and conditions**  
**Speaker: Dr. Siavash Hassanpour and Dr. Ryan Schure**

**Dr. Siavash Hassanpour, HBSc, MSc, DDS, MSc (Perio), FRCD(C)**

Dr. Hassanpour graduated from the University of Toronto in 2008 with a degree in Cellular and Molecular Biology (HBSc). In 2010, Dr. Hassanpour entered the Doctor of Dental Surgery program at the Faculty of Dentistry, University of Toronto. Dr. Hassanpour entered the Periodontology Speciality program in 2014 and earned his speciality training and degree in Periodontics (MSc Perio) at the University of Toronto in 2017. Dr. Hassanpour is a licensed periodontal specialist and a board-certified periodontist. He has a practice limited to Periodontology in North York and is

a part time clinical instructor at the University of Toronto's Graduate Periodontology Clinic. Dr. Hassanpour is currently serving as the past-president of the Toronto Central Dental Society, is a ODA general council member and is an executive on the Ontario Society of Periodontology.

**Dr. Ryan Schure, DDS, MSc (Perio), FRCD(C)**

Dr. Ryan Schure earned his Doctor of Dental Surgery degree from the University of Toronto in 2010. He went on to complete his Master of Science degree with advanced training in periodontology and implant surgery at the University of Toronto. His research on the relationships between cardiovascular diseases and periodontal diseases has been published and presented at international meetings. Dr. Schure is a Fellow of the Royal College of Dentists of Canada and a Diplomate of the International Congress of Oral Implantologists. He is currently on the executive of the North Toronto Dental Society and Alpha Omega Dental Society. He continues to maintain strong affiliation to the University of Toronto as an Associate in Dentistry, where he contributes to the clinical and didactic training of undergraduate and graduate dental.

**Classification and diagnosis of periodontal and peri-implant diseases and conditions: Putting the new classification system into practice**

A classification scheme for periodontal and peri-implant diseases is necessary for clinicians to properly diagnose and treat patients as well as for researchers to investigate etiology, pathogenesis, natural history, and treatment of the diseases and conditions. The previous (1999) classification system has been widely utilized for the past twenty years, but since this was developed, substantial new information has emerged about these conditions and diseases. The analysis of this evidence has prompted the development of a new classification framework for periodontitis. This 3-hour lecture-based course will review the proceedings of the World Workshop on the Classification of Periodontal and Peri-implant Diseases and Conditions from 2017, where the former classification was revised and expanded. The diagnosis of gingival health, gingivitis, periodontitis, peri-implant diseases, and other conditions affecting the periodontist using the new classification system will be reviewed using cases and allowing clinicians to implement this into their practice immediately.

**Objectives:**

- Discuss why a new classification system was needed
- Compare and contrast the new classification system to the 1999 classification system and review the major difference between the systems
- Be able to classify and diagnose: periodontal health, gingival health, gingivitis, periodontitis, peri-implant health, peri-implant mucositis, peri-implantitis, mucogingival defect, periodontal-endodontic infections and other periodontal disease
- Understand the new classification of periodontitis including the staging and grading of periodontal disease

**Omar El-Mowafy**  
**BDS, PhD, FADM**

Dr. Omar El Mowafy graduated from Cairo University dental school in 1979. He subsequently completed his post grad studies in prosthetic dentistry from University of Manchester, United Kingdom. He went on to teaching assignments in Jordan thereafter and was appointed head of Department of Restorative Dentistry at Faculty of Dentistry of University of Toronto in 2012. Currently he is a professor of Restorative Dentistry in the Faculty of Dentistry at University Of Toronto. He has authored several scientific papers on Prosthetic Dentistry and has published numerous papers to his credit.

He maintains a private practice in Mississauga apart from his appointment at the Faculty of Dentistry,

**Course objectives:**

- To provide an update on porcelain veneers with emphasis on case selections and appropriate diagnostics, preparation designs, alternative new glass-ceramic materials and cementation Protocol.
- To provide an update on anterior and posterior crowns, their preparation designs, cementation protocols and occlusal adjustment.

## Clots, Clasts and Caries:

Oral surgical management of your medically compromised patient - Knowledge Update 2020

**Speaker: Don Hui & Dr. Kal Rammo**

**Don Hui, DDS FRCD(c)**  
Oral & Maxillofacial Surgeon

Dr. Don Hui received his DDS from the University of Toronto in 2000. He later obtained a Certificate in the Practice of General Dentistry in 2001 at the Strong Memorial Hospital, University of Rochester, Eastman School of Graduate Dentistry. He then went on to the University of Minnesota in Minneapolis and the Saint Vincent Catholic Medical Centers in New York to complete his Oral and Maxillofacial Surgery and Anaesthesia Specialty training in 2006. He is a Fellow of the Royal College of Dentists of Canada.

Currently, Dr. Hui maintains a full-time Oral and Maxillofacial Surgery practice in Woodbridge, ON. His particular interests include advanced pre-implant regenerative techniques for hard and soft tissue augmentation. He has a penchant for adopting new technologies including digital scanning.

Dr. Hui is the chairman of DISCOV:R (Dental Interdisciplinary Study Club of Vaughan: Roundtable), an innovative forum representing all nine specialties of dentistry at its core.

**Dr. Kal Rammo, DDS Dip.ABOMS FRCD(c)**  
Oral & Maxillofacial Surgeon

Dr. Rammo's educational experience started as an undergraduate in 1990 at the University of Toronto. He received his Doctor of Dental Surgery degree from the State University of New York at Buffalo in 1997 where he graduated with a major in Oral Medicine. Following graduation, Dr. Rammo pursued a one-year general internship at Toronto's Mount Sinai Hospital followed by a focused oral surgery internship at the University of Rochester in New York. From there he completed his residency in Oral and Maxillofacial Surgery in 2005. He trained under the world-renowned surgeon Dr. Robert E. Marx at the University of Miami, School of Medicine, which included a heavy emphasis on reconstructive surgery of the head and neck. Dr. Rammo has been awarded the title of Fellow from the Royal College of Dentists of Canada. He is a Diplomate of both the American Board of Oral and Maxillofacial Surgery and the National Dental Board of Anesthesiology.

### Course Description

The practice of dentistry grows more complex every year. There are more treatment options, procedures, materials, medications and ways to communicate than ever before. While the explosion of knowledge and information has resulted in great advances, it can also create new risks for patients and practitioners.

This course, offered by the Professional Liability Program of the RCDSO, examines emerging issues affecting dentists and offers risk management advice. PLP cases that have been resolved provide illustrations and tips to benefit you in your day-to-day dental practice.

### Learning Objectives

At the end of the session, participants will understand:

- the role of PLP;
- details of PLP malpractice protection;
- the basics of offering a refund to a patient;
- the risks of social media;
- teledentistry and its risks;
- how good recordkeeping helps manage risk;
- informed consent from a litigation perspective; and
- ways to prevent adverse events in daily practice.

### Course Presenters

This course will be presented by PLP staff.
