CONTINUING EDUCATION COURSE CALENDAR 2017-2018

- 3 CORE (CATEGORY-1) Evening Courses (with dinner)
- 5 Evening Courses (with dinner) - includes CPR Recertification
- Continuing Education Credits in Category - 2 & 3
- Introduction to New Technology in the Industry

www.sadaonline.org

1. Sept 14, 2017 : **The Heart of Dentistry- Core Course**
5.00 pm - 9.00 pm Dr. Bryan Waxman
2. Oct 26,2017: **Crown and Bridge or Implant? What should I do?**
5.30 pm - 8.30 pm Dr. Mario Rotella
3. Nov 16,2017: **Periodontic Potpourri: A No Holds Approach to Everything & Anything You Need To Know About Periodontal Therapy!**
5.30 pm - 8.30 pm Dr. Vinay Bhide
4. Dec 7,2017: **Handling Adverse Events and Negative Outcomes - Core Course - RCDSO – speaker tba**
5.00 pm - 9.00 pm
5. Jan 18,2018: **Medical Emergencies and CPR**
5.30 pm - 9.00 pm Dr. Neil Gajjar
6. Feb 22/2018: **Tips to Uncover Dormant Practice Revenue**
5.30 pm - 8.30 pm Dale Tucci – TMFD
7. March 22,2018: **Pulp and Periodontal Relationship- Core Course**
5.00 pm - 9.00 pm Dr. Ryan Shure and Dr. Geoff Sas
8. April 12,2018: **Importance of CBCT – Dr.Milan Madhavji Update on Quality Assurance Program and Future Directions in Continuing Education.**
5.30 pm - 8.30 pm Dr. M.Gardner – RCDSO

The Heart of Dentistry- Core Course
How to Manage the “Cardiac Patient” Safely in your Dental Practice
Speaker: Dr. Bryan Waxman

Dr. Bryan Waxman
BHSc(Hon), DDS, Dip. Anaes., Dip. ADBA
Certified Specialist in Dental Anesthesia (Ontario)

Dr. Waxman is a Board Certified Specialist in Dental Anesthesiology. He graduated from the University of Toronto Doctor of Dental Surgery (DDS) program and then completed a 2-year Specialty Diploma in Dental Anesthesiology from Stony Brook University, Long Island, NY. He was Chief Resident of the program in his senior year.

Dr. Waxman is an interviewer for the DDS admissions committee at U of T and is an Oral Board Examiner for the American Dental Board of Anesthesiology. Additionally, Dr. Waxman is a Diplomate of the American Dental Board of Anesthesiology (ADBA), President of the Canadian Academy of Dental Anesthesia(CADA), and member of the American Society of Dental Anesthesiologists (ASDA), ODA, CDA, and Alpha Omega Dental Fraternity.

In addition to practicing operator anesthesia in private practice at Vaughan Mills Sleep Dentistry, Dr. Waxman is a Clinical Instructor in the University of Toronto's Dental Anaesthesia Department and he supervises pediatric general anaesthesia cases with the senior residents.

Course Objectives:

- To understand normal cardiac structure and function in order to fully appreciate what is happening with abnormal cardiac structure and function and to refamiliarize ourselves with common medications that cardiac patients are taking
- To understand how our drugs we inject or prescribe affect our cardiac patients
- To be fully prepared to handle the emergencies and urgencies of cardiac origin in our dental practices most effectively

Mario Rotella is a Fellow of the Royal College of Dentists of Canada (F.R.C.D.(C)), certified specialist in Prosthodontics.

Dr. Rotella received his Doctor of Dental Surgery from the University of Siena (Italy), where he graduated with *summa cum laude*.

He completed a 2-year Advance Education in General Dentistry program at the Eastman Institute for Oral Health, University of Rochester, Rochester, NY. At the same institution, he completed a 3-year Prosthodontic program and a 1-year Implant surgical fellowship. While in the US, Dr. Rotella received several awards from AIOP (Italian Association of Prosthodontist), AAFP (American Academy of Fixed Prosthodontics), APS (American Prosthodontic Society) and from the Eastman Institute for Oral Health.

Dr. Rotella serves as examiner for the National Specialty Examination in Prosthodontics which is administered by the Royal College of Dentists of Canada. He is also a clinical instructor in Prosthodontics at the Faculty of Dentistry, University of Toronto.

SINGLE IMPLANT RESTORATION

Dental implants are becoming more popular in everyday dental practices and the replacement of the single missing tooth is probably the most common indication.

Patients today are increasingly aware of dental implants and are expecting more pleasing restorations that mimic aesthetically and functionally the natural tooth.

In order to be competitive, the dentist today must be able to meet those expectations and be able to select the right implant.

Lecture Objectives:

- Compare single-implant vs. 3-unit bridge treatment options
- Understand the “basic” rules of implant placement, considering both surgical and prosthetic aspects
- Select the right implant, understanding when to use a bone or a tissue level
- Understand the advantages and disadvantages of the different abutment types available in the market
- Review the most common prosthetic complications

Dr. Vinay M. Bhide

B.ArtsSc.(Hons.), D.D.S., M.Sc.(Perio.), F.R.C.D.(C) Diplomate, American Board of Periodontology

Dr. Vinay Bhide is a board certified Periodontist who provides the full scope of surgical periodontal and dental implant therapy. Dr. Bhide has a special interest in esthetic and reconstructive periodontics including soft tissue grafting for correction of gingival recession, periodontal regeneration, and pre-prosthetic site development. Dr. Bhide earned his DDS from the University of Toronto in 2001, and subsequently completed a one-year internship at Mount Sinai Hospital in Toronto. He completed his Master of Science and specialty training in Periodontology at the University of Toronto in 2005. Dr. Bhide is a Fellow of the Royal College of Dentists of Canada and Diplomate of the American Board of Periodontology. Dr. Bhide has published several articles in peer-reviewed journals. Lastly, Dr. Bhide is also involved in didactic and clinical teaching of periodontics at both undergraduate and post-graduate levels and has lectured nationally and internationally on various topics related to Periodontology.

This lecture is designed to meet the needs of clinicians who want practical answers and advice regarding periodontal therapy for their patients. The format of this course will be composed of a series of short presentations touching on various relevant topics in periodontics today framed by focused clinical questions which dentists face on a daily basis. Topics covered will include non-surgical vs. surgical periodontal therapy, treating gingival recession, regenerative periodontal therapy, and peri-implant diseases among others. As the title for this course suggests, a critical and evidence-based approach will be emphasized and Dr. Bhide will present the facts as objectively as possible. In short, Dr. Bhide will tell it like it is! You will leave the lecture with practical pearls of periodontal wisdom that you can start to apply in your practice immediately! This promises to be an informative and entertaining evening and should not be missed!

Julian Perez

MA, JD

Julian received his Masters Degree in Human Rights and International Law from the United Nations mandated University for Peace in San Jose Costa Rica, In 2010, Julian completed his Juris Doctor degree at the University of Columbia School of Law in New York City where he graduated with honours. After 3 years working as a litigation associate in the New York City office of a full services international law firm, Julian moved to Toronto Canada. He is currently employed as an Investigator in the Professional Conduct and Regulator Affairs Department of the Royal College of Dental Surgeons of Ontario.

The Professional Liability Program (PLP) provides malpractice protection and risk management advice to Ontario dentists. In this interactive presentation, PLP staff will describe dentists legal obligations when an adverse clinical event occurs and provide practical advice for managing care and communicating with patients following an adverse event or negative treatment outcome.

Learning Objectives:

- * Be able to define adverse events and distinguish them from other negative treatment outcomes
- * Know your legal and professional obligations when an adverse event occurs
- * Be able to develop strategies for communicating with patients and their families about an adverse event

Dr. Neil Gajjar

BSc, DDS, MAGD, FADI, FPFA, FICD, Cert. IV Sedation

Dr. Gajjar lectures on managing medical emergencies in the dental office, has been a lecturer of oral pathology and clinical instructor at the Canadian Academy of Dental Hygiene, and has served as a clinical instructor in the Oral Diagnosis and Emergency clinics at the University of Toronto, Faculty of Dentistry. Dr. Gajjar is a Master of the Academy of General Dentistry, a Fellow of the Academy of Dentistry International, a Fellow of the Pierre Fauchard Academy and a Fellow of the International College of Dentists. He has served on the Disciplines Committee, QA Committee, as Councilor, and currently serves on the PLP Committee of the Royal College of Dental Surgeons of Ontario. He is a Clinical Examiner for the NDEB, President-Elect of the AGD, is certified in IV sedation and serves as the official dentist for the Miss India Canada Pageant and Suhaag Publication Group.

Course Outline:

Dr. Gajjar will review the steps to follow when you encounter a medical emergency in your office. A recertification of CPR for health care providers will be offered as well as the use of an AED for targeted responders. Yearly CPR renewal is required for all office staff and this course presents an excellent opportunity for members of the dental office to stay current with the new changes in CPR protocol.

Due to changes in heart and stroke protocol, participants will need to provide their complete contact information including email to receive their certification card.

Dale Tucci:

Dale Tucci is the founder of Tucci Management Consultants Inc. (TMCI) and merged with Tax Matters For Dentists (TMFD) in 2015. She heads the Tax Matters For Dentists (TMFD) practice management division where her team offer a wide variety of custom practice management services, transition planning, business coaching, associate recruiting, marketing and human resource services. Dale helps dentists get more from their dental practices by increasing margins and helping them discover new business opportunities that they did not think were possible. She is trusted by thousands of clients and has a 35 year track record of success providing hands on solutions.

ADDITIONAL SEMINARS BY TMFD

Seminar 1

Date: Thursday - 8th March, 2018

Venue: TMFD Financial Mississauga- 350 Burnhamthorpe Rd. W, Suite 218, Mississauga

Time: 5:30pm – 6:30pm registration and snacks , 6:30pm-7:30pm lecture

Speaker: Stive Farronato and Chris Molloy

Topic: Preparing Your Practice For Sale

Attendees: Dentists only – 10 spots available

Seminar 2

Date: Thursday - 19th April, 2018

Venue: TMFD Financial Mississauga- 350 Burnhamthorpe Rd. W, Suite 218, Mississauga

Time: 5:30pm – 6:30pm registration and snacks , 6:30pm-7:30pm lecture

Speaker: Dale Tucci

Topic: Measuring Practice Performance

Attendees: Dentists only – 10 spots available

Dr. Ryan Schure

DDS, MSc. (Perio), FRCD(C).

Dr. Geoffrey Sas

BMSc(Hons), DDS, Dip. Endo, FRCD(C).

Dr. Geoffrey Sas completed his undergraduate degree in Biomedical Science from the University of Western Ontario where he specialized in Physiology and Pharmacology. He then received his doctor of dental surgery degree from the University of Toronto. Dr. Sas completed a residency program at the University of California in Los Angeles then received his certificate in Endodontics at Nova Southeastern University. Geoffrey is a fellow of the Royal College of Dentists of Canada and is also a part time clinical instructor the University of Toronto.

Dr. Ryan Schure is a graduate of the University of Toronto's Faculty of Dentistry. He went on to complete a Masters of Science degree in Periodontology, where his research, which focused on the link between periodontal diseases and cardiovascular diseases, has been published and presented internationally. Dr. Schure is currently a Fellow of the Royal College of Dentists of Canada and a Diplomate of the International Congress of Oral Implantology.

Session Outline:

The interrelationship between endodontic and periodontal diseases has been a subject of speculation, confusion and controversy for many years. An endo-perio lesion can have a varied pathogenesis, ranging from quite simple to relatively complex. These lesions often present challenges to the clinician as far as diagnosis and prognosis of the involved teeth are concerned. It is essential to make a correct diagnosis so that an appropriate treatment plan can be developed. To make a correct diagnosis, the clinician must have a thorough understanding of these lesions and may need to rely on restorative, endodontic or periodontal therapy, either singly or in combination, to treat them. Therefore, this presentation will highlight the clinical diagnostic guidelines and decision-making steps required to appropriately manage these lesions.

Learning objectives:

- 1) To understand the biological basis of the interrelationship between the pulp and periodontium
- 2) To understand the clinical evaluations required to accurately diagnose periodontal, endodontic, and combined lesions
- 3) To determine the prognosis of teeth affected by periodontal-endodontic lesions
- 4) To make evidence-based decisions when determining appropriate treatment plans for the management of periodontal-endodontic lesions

Part 1: Importance of CBCT

Dr. Milan Madhavji

Milan Madhavji graduated the University of Manitoba in 2006 with an honours DMD and a concurrent B.Sc in Dentistry. He practiced general dentistry in Northern Manitoba for a year before attending the University of Toronto Oral and Maxillofacial Radiology program from 2007 to 2010. He is a full-time oral radiologist at Canaray, and has reported 40,000 CBCT scans as of April 2017.

Milan's specific areas of interest are CBCT reporting for endodontics and 3D planning for guided surgery. He has developed the Accuplant universal guided surgery system to enable everyone to have access to guided surgery with minimal upfront costs. Currently, he is working on a software solution that will enable online real-time perusal of CBCT and collaborative implant planning, without the need for any software downloads.

Course outline:

- Evaluation of extraoral plain films - Pan and ceph
- Indications for CBCT
- Principles of 3D imaging
- Pitfalls and artifacts in 3D imaging
- General technique for CBCT interpretation
- Implant planning overview with 3D software
- Quick review of available online software and educational resources for learning 3D interpretation and planning

Part 2: Update on Quality Assurance Program and future directions in continuing education speaker: Dr.Michael Gardner , RCDSO
